NETWORK

Data sheet: LN-227

Product code	:	LN-227
Product name	:	Network Cable Box
EAN code	:	8716502004751
Qty. masterpack / carton	:	-/2
Gift box weight	:	3 kg.
Gift box dimensions	:	340 (W) x 350 (H) x 235mm (D)

Network Cable Box forms a basis for every cabled network, at home or in the office. You can use the 1000 feet (300+ metres) of cable to wire your network exactly as you want. By cutting the UTP cable to the desired length and attaching RJ45 connectors you can also make your own patch cables, interconnecting your network devices. Utilising a "pull-out" packaging design, the cable roll stays manageable and compact.

Box content:

- 1000 feet (300 metres) UTP Network Cable

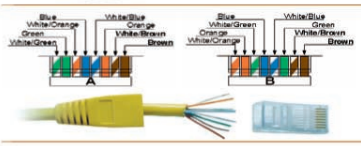
Key features:

- Enables you to create your own tailor-made patch cables and

How to cable your network:

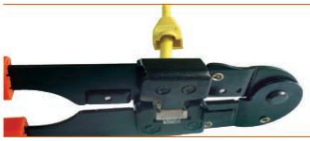
Cut the cable in the desired length (max. 300 feet / 100 metres). Put the cable through the boot. The boot will protect the patch cord after assembly.

Strip the cable jacket 25mm from the end of the cable, using the strippeing tool, to expose the individual wires.



Place the wires in the right color-order (A or B). Hold the grouped (and sorted) wires together tightly, and cut them straight.

Insert the wires into the connector (pins facing up). Push hard to assure that all the wires have reached the end of the connector.



Place the connector into the crimp tool, and squeeze hard to assert as much pressure possible.

Pull the boot forward to cover the connector.Repeat the process on the other end. For a straight cable, use the same wiring at both ends. For a crossover cable, wire one end A, and the other end B.
